FRUITCAKE TOKEN
WHITEPAPER PREVIEW

Fruitcake Token (Fruitcake) is a BEP20 governance token for the Fruitcake Swap DEX will build the future on the launch pad and start up tokens by providing innovative use cases to the ecosystem. Such as LAUNCH/LIST new tokens, SWAP/TRADE, FARMING, STAKING, Web 3.0 CASINO.

Fruitcake holds the community members together. Holders will be able to claim rewards by staking, playing the games, and participating in key governance votes. Players will also be able to generate $Fruitcake when they stake, farm and play several games inside the platform and through user driven incentives.

Staking and Farming
Players will be given the option to hold their tokens and will be rewarded with newly created Fruitcake in return. Stakers will be required to vote and play to claim rewards.

Launching and Payment
Fruitcake will be the accepted currency within the platform. It may be used to determine eligibility for participation in certain listing of new tokens inside the DEX and we are committed to be the cheapest price to the whole crypto space, from listings to taxation

Governance and DAO
The Community Treasury will be available to receive revenues generated by fruitcake casino games and a portion of staking rewards. This treasury will be managed by fruitcake stakers once the network is sufficiently decentralized.

STAKING FRUITCAKE

The ability to stake acts as an incentive for locking up fruitcake and supporting the ecosystem. Stakers will be rewarded with freshly issued fruitcake and will have the chance to pitch their ideas and proposals to develop the platform.

FRUITCAKE TOKEN

WHITEPAPER

Fruitcake Token (Fruitcake) is a BEP20 governance token for the Fruitcake Swap DEX will build the future on the launch pad and start up tokens by providing innovative use cases to the ecosystem. Such as LAUNCH/LIST new tokens, SWAP/TRADE, FARMING, STAKING, Web 3.0 CASINO.

The ultimate goal with fruitcake swap is to align the incentives between the users, traders, stakers and the developers in original and exciting ways. First, by rewarding BUSD to user and token holders who interact with all fruitcake swap facilities while incentivizing them to lock up their tokens to generate additional rewards. Second, by decentralizing the ownership and governance of all its use cases and purpose

We aim for fruitcake swap to be one of the DEX in blockchain genuinely owned and operated by the community that utilizes it. There are unlimited possibilities and opportunities, and we will approach them carefully. There are a lot of tokens that came to the battle unprepared, and most of them are abandoned. This practice used the term "decentralization" as a way to deceive potential users and stakers. The real shift to decentralization takes time and we will work to achieve it one step at a time.

In the future, the Community Treasury will be available to receive revenues produced by fruitcake swap and a portion of staking rewards. This treasury will be managed by $fruitcake stakers once the network is sufficiently decentralized. The inflows will initially be generated from our exchange transactions and a portion of collectibles' sales. More sources will be added as new opportunities arise.

TOKEN ALLOCATION

Fruitcake token will be unlocked cautiously and progressively.

Token Amount	Total Supply	Percentage	Unlock Schedule
Staking and Farming	500,000,000	50	Locked
TEAM (dev, and marketing)	150,000,000	15	Locked
Liquidity pool & other exchange	100,000,000	10	Locked
Partnership & Emergency fund	100,000,000	10	Locked
Seed Sale	60,000,000	6	Locked
Private Sale	50,000,000	5	Locked
Public Sale and Airdrop	40,000,000	4	Locked
Total Amount	**1,000,000,000**	**100**	**Locked**

Staking and Farming

Token Amount	Percentage	Unlock Schedule
500,000,000	50	Locked

Fruitcake Token's 50% total supply will be allocated to Staking and Farming Rewards. With this, we aim to give benefits to community members that have a long term mindset and belief that our tokens will have a great value overtime. When user lock up their tokens by staking, they will receive corresponding rewards which are newly generated $fruitcake.

An upgrade to the staking system will be developed in the future. This will assist in generating better rewards for members that measurably contributed additional value to the Fruitcake ecosystem.

TEAM Dev and Marketing Allocation

Token Amount	Percentage	Unlock Schedule
150,000,000	15	Locked

Fruitcake Token's 15% total supply will be allocated to the Blockchain Dev, Game Dev, and budget for continues marketing in vesting schedule of 12 months and continuous incentivization will be required to keep developing and upgrading after the successful token sale.

Partnership and Emergency fund

Token Amount	Percentage	Unlock Schedule
100,000,000	10	Locked

Fruitcake Token's 10% total supply will be allocated to the partnership, and budget for emergency fund this will help the platform grow by participating other projects that relevant to the platform. And also help us to ensure the stability of the platform.

Liquidity Pool and other exchanges

Token Amount	Percentage	Unlock Schedule
100,000,000	10	Locked

Fruitcake Token's 10% total supply will be allocated to the liquidity, and other exchanges this will help the token to stabilize the valuation by locking-up the 10% of newly generated token and by participating other exchanges that relevant to the use case.
